

Guidline for Swedish intensive care 2025

The purpose for the Guideline for Swedish Intensive Care is to create a uniform national structure for the organization, staffing and working methods of intensive care, and competence requirements. The Guideline is an updated version from the one published by the Swedish Society for Anesthesia and Intensive Care (SFAI) in 1995; partly based on recommendations from the European Society of Intensive Care Medicine (ESICM; www.esicm.org). ESICM has recently updated its guideline and this revision focuses mainly on the modern perception of quality and organization.

By clarifying requirements, this guideline serves as guidance for planning and running an intensive care unit, as specified according to its duties and category (2.1 - 2.4). The stratification of the intensive care units is decided by the health care authorities, and the category specifics follow the European standard.

The question answered in this report is listed at page 5.

NOTE! The statistics only contain units that have reported data to the Swedish Intensive Care Registry. Missing units:
